Armoured One is a security company with its focus on protecting K-12 schools from an active shooter attack. Armoured One protects schools through our 3-part approach of train, assess, protect. We conduct security assessments in schools, colleges, and universities to help mitigate physical security concerns. Armoured One is the nation's leading expert in K-12 active shooter attacks and physical security. Armoured One manufactures security glass and the nation's only window film that passes the ASTM F3561 standard. The ASTM F3561 test was created to slow down or stop active shooter attacks.

CENTEGIX is the leader in incident response solutions. CENTEGIX innovates safety solutions to empower and protect people every day. Leaders nationwide trust our safety solutions to provide peace of mind in the workplace. Our Safety Platform is the fastest and easiest way for staff to get help in an emergency, from the everyday to the extreme. CENTEGIX Safety Platform™, featuring CrisisAlert™, accelerates your response to emergencies. We've built the CENTEGIX Safety Platform to support you in the single most critical factor of incident response: time. Because in an emergency, every second matters. The solution provides first responders and law enforcement with the most accurate location information, enabling them to respond faster in any situation. CrisisAlert™ is a safety and security solution unique for its ability to deliver precise alert location, immediate audio and visual incident notifications, simple activation via a wearable CrisisAlert™ badge, and 100% full campus coverage.

Collaborative Response Graphics (CRGs) - Emergency Response Mapping Data that is useable under stress to coordinate a crisis response both inside and outside a building. CRGs are considered a life safety best practice that enhances response times and improves command and control during an incident by establishing a common language and unified points of reference between internal teams and response units. CRGs are site-specific and are intended to be ingested into any preexisting school or public safety platform. Our product meets and exceeds all the requirements of Florida House Bill 301.

Kelsey Winter

geocomm@geocomm.com

320-240-0040

GeoComm, provider of Public Safety Location Intelligence®, has nearly 30 years of experience delivering turnkey public safety GIS systems that route emergency calls to the appropriate 9-1-1 call center, map the caller's location on a call taker or dispatcher map, and guide emergency responders to the scene of the accident on mobile displays within police, fire, and ambulance vehicles. GeoComm School Safety is a digital mapping solution which leverages the latest Esri ArcGIS technology to support faster response to school emergencies. This solution provides detailed indoor maps of schools and surrounding grounds, along with critical information needed by school safety authorities, public safety agencies, and first responders for streamlining and reducing response times to emergencies inside schools. Visit www.geocomm.com to learn more.

Michael J. Day

m.day@SafeEVAC.com

812-250-2965

SafeEVAC, Inc. is headquartered in the U.S. and leading the way to safety to save lives. With increased shooting incidents, company founders recognized a uniform evacuation plan to protect our nations' school children did not exist. On a mission to honor life and equip people in emergency evacuations, patent-pending technology was developed to enhance regulatory required exit signs into an Intelligent Evacuation Threat Assessment and Rapid Response System. Within new exit signage, SafeEVAC's Intelligent Exit incorporates speaker, microphone, camera, gunfire detection, including color and strobes. When other potential threats are being evaluated, the system remains dormant to avoid false positive alarms. A family of intelligent signage only change color and strobe during practice drill mode or active evacuation which also activates speakers, microphones, and camera and shares building floorplan with Operation Center, Law Enforcement, and Facility Management. Red signs audibly and visually identify danger areas. Yellow strobing signs visually directs first responders. Green signs visually and audibly identify safe evacuation. Evacuation plans of action are ready to deploy and customized by location. Operation Centers stand ready to share intel about active floorplan and support law enforcement as long as needed. The end result, everyone involved knows what to do, where to go, within seconds to save lives!

SaferWatch is a multi-faceted and flexible community safety platform that provides real-time two-way communication between public users and 911 centers to report emergency and non-emergency situations. SaferWatch improves emergency response time and prevents incidents by supplying actionable intelligence to Law Enforcement, government officials, and school administration. We provide teachers, staff, and government employees with mobile, wireless, and fixed position panic buttons that connect directly to Law Enforcement. Public users, parents, and students use the SaferWatch mobile application to document concerns, report tips, and stay informed. Our mass alert and panic button solutions are easy to deploy, meet Alyssa's Law requirements, and are currently used by 6 of the largest 10 school districts in the country.

Brett Handell

brett@zeroeyes.com

508-330-5209

ZeroEyes AI software analyzes camera feeds looking for guns. Once a gun is detected and confirmed by the human in the loop, alerts are dispatched to the school and law enforcement within seconds. Providing exact location, with time stamps, and additional information that can reduce response time and create situational awareness.
